Professional Summary

Soon-to-graduate Computer Systems Engineer with experience developing software for both national and international companies. Background in Full Stack projects, desktop applications, and web services, along with data analysis skills used to turn raw information into insights that are genuinely useful to end users. Looking to join a professional environment where I can broaden my technical knowledge, grow personally, and contribute to the optimization of technological processes.

Education

Instituto Tecnológico de Morelia, B.Eng. in Computer Systems Engineering August 2021 - Present

- **Relevant Coursework:** Artificial Intelligence, Operating Systems, Network Administration, Software Development, Data Science, Mobile Applications.

Experience

Intern - Facility Engineering Support, Samsung Electronics México - Querétaro. January 2026 - July 2026

- Designed and implemented a Full Stack system with PHP and jQuery to digitize the spare-parts checkout log, eliminating data-entry errors caused by manual processes.
- Designed and managed database connections using MariaDB, with WampServer as the web development environment.
- Built dashboards for data visualization using Chart.js.
- Processed machinery and industrial robot data in Excel to generate reports.

Freelance Developer, Clínica de Ojos Santa Lucía – Morelia, Mich. June 2025 – July 2025

- Developed and designed a desktop application in Java for creating and managing service tickets.
- Implemented a Java Swing GUI for handling and viewing tickets and monthly sales reports, using SQLite for data storage.
- Created automated reports in PDF and CSV format.

Social Service, Centro de Lenguas Extranjeras – Morelia, Mich. January 2025 – June 2025

- Developed and implemented front-end and back-end modules using the Laravel and Livewire frameworks.
- Implemented models, migrations, and seeders for the application's core modules.
- Designed intuitive and visually appealing front-end interfaces.
- Managed and resolved Git branch conflicts to keep development running without interruptions.

Technical Skills

Programming Languages: JavaScript, PHP, SQL, Java, Python

Frameworks: Laravel, Livewire, React, Next.js, Tailwind CSS

Technologies: PostgreSQL, MariaDB, Git, Docker, Linux, Excel (Intermediate)
